

## SEAFOIL SYSTEMS STORAGE BARGE

Our towable storage barges are designed to be easily towed behind our skimmer boats and allow for simple and transfer of waste from the onboard collection tanks to the barge.

Seafoil Systems standard 10m towable barge has been designed to be paired with our 8m skimmer vessel for coastal waterways, lakes and river systems.

The barges inflatable tubes are made using heavy duty PVC and come with aluminium hard deck and towing mounts.

Designed to offer substantial secondary storage for extended cleanup operations, the Seafoil Systems storage barge can also be customized in any size depending on user requirements and applications.

**Dimensions:** L 10m x W 3.5m    **Weight Capacity:** 8000kg
